DETAILED ACTION

1. According to a preliminary amendment filed on Oct. 25, 2007, the applicants have canceled claims 15 and 16 and furthermore, have added new claims 23-25.
2. Claims 1-14 and 17-25 are now pending in the application.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) In part 1-14 and 17-22, drawn to Compounds of formula (I) where variables Z, R2 and Ra together with the carbon atoms to which Z and Ra are attached do not form a ring, a process for preparing these compounds, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Group II, claim(s) In part 1-14 and 17-22, drawn to Compounds of formula (I) where variables Z, R2 and Ra together with the carbon atoms to which Z and Ra are attached do form a ring, a process for preparing these compounds, pharmaceutical compositions containing these compounds and methods of treatment using these compounds.

Group III, claim(s) In part 23, drawn to Compounds of formula (III) where variables Z, R2 and Ra together with the carbon atoms to which Z and Ra are attached do not form a ring.

Group IV, claim(s) In part 23, drawn to Compounds of formula (III) where variables Z, R2 and Ra together with the carbon atoms to which Z and Ra are attached do form a ring.

Group V, claim(s) In part 24 and 25, drawn to Compounds of formula (X) where variable R2 represents an aryl group.

Group VI, claim(s) In part 24 and 25, drawn to Compounds of formula (X) where variable R2 represents a heterocyclyl group.

Art Unit: 1625

4. The inventions listed as Groups I through VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

There is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives; see PCT Administrative Instructions Annex B Part I (f) (i) (B) (1).

5. A telephone call was made to the applicant's attorney, Mr. Tony Zhang on May6, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
